## 3M - Case Study

“There is no more manual consolidation. Impressive software for detailed log analysis”

### Summary

3M Thailand Limited was established in 1967. For over 40 years, 3M Thailand has built a reputation for quality and operational excellence serving Thai customers in the automotive, electronics, hospital, food processing and retail industries. 3M Thailand manufactures and markets abrasives, filtration products, Post-it® Brand products, Scotch® Brand Foam Tape, Scotch® Tape, graphics for the automotive industry, healthcare products including surgical tapes, dressings, first aid bandages and other products in Thailand

### The Challenge

XpoLog helps us to consolidate logs from difference servers in difference formats in real-time and proactive manner. It is helping us to Analyze and pinpoint the problems much faster

### The Solution

When something goes wrong on production, it is often difficult to get fast to the information to pinpoint the problem. We have logs in different directories, difference servers and in difference formats, we have no tools consolidate and analyze those logs

### The business benefits

There is no more manual consolidation. The support team can now perform analysis on the comprehensive consolidated information. It is helping us to analyze and pinpoint the problems much faster then ever before
