

University of Arkansas Criminal - Case Study

“We were at a loss for a tool to use for our incident response class and XpoLog fit our needs perfectly”

Summary

The Cyber-terrorism Defense Analysis Center at the University of Arkansas Criminal Justice Institute is a training provider for the U.S. Department of Homeland Security delivering cyber-security training to first responders across the U.S.

The Challenge

XpoLog enables us to simulate real world log analysis in a laboratory environment

Why XpoLog?

We needed a tool whereby we could aggregate and analyze logs from many sources such as Snort sensors, syslogs servers and Wire-shark

The business benefits

XpoLog is impressive technology in a single package for detailed log analysis. We are very pleased with this software since it enables our students to gain real experience in the incident response process
